EXECUTIVE SUMMARY

SaaS specialist with 15+ years of experience owning complex, multi-stakeholder SaaS and technology programs across Fin-tech, Health-tech and Enterprise softwares. Proven record of driving end-to-end product and release delivery for large, multi-product accounts — partnering with executive stakeholders, Product and Engineering teams to deliver predictable, high-quality outcomes. Skilled in hybrid Agile/Waterfall delivery, risk and dependency management, and translating technical complexity into clear, outcome-focused executive communication.

Seeking to bring enterprise program ownership, cross-functional leadership, and a customer-first delivery mindset.

CORE COMPETENCIES

- Program Delivery: End-to-end delivery ownership, multi-phase onboarding plans, milestone governance, Schedule>Budget>Scope>Risk>Dependency visualization
- Executive & Stakeholder Leadership: Steering committee updates, executive reporting, escalation management, building long-term customer trust
- Cross-Functional & Partner Collaboration: Leading through influence across Sales, Product, Engineering, QA, and Business teams to align delivery with commercial and customer outcomes
- Delivery Methodologies: Agile, Scrum, and Hybrid Agile/Waterfall delivery; structured recovery/reset planning for at-risk engagements
- SaaS & Cloud Platforms: Multi-product SaaS implementations, AWS, GCP, Microservices, CI/CD, cloud-based release operations
- Mentorship & Delivery Excellence: Mentoring junior team members, standardizing onboarding/delivery frameworks, KPI definition and tracking

PROFESSIONAL EXPERIENCE

Exabyting Technologies | Dhaka, Bangladesh

Senior Project Manager

Sep 2025 – Present

SaaS | Cloud Operations | Fintech Implementations

- Own end-to-end delivery of concurrent SaaS engagements for local and global fintech clients, acting as primary delivery owner from handover through go-live.
- Manage 4 concurrent, multi-stakeholder project pipelines, improving deployment efficiency and reducing production errors.
- Define KPIs and standardize delivery/process-improvement frameworks across cross-functional teams.
- Partner with Engineering and Business stakeholders to align priorities, manage risk and scope trade-offs, and ensure seamless global releases.
- Oversee recruitment, budgeting, and global team alignment to support scaling delivery capacity.

Augmedix-Commure | Dhaka, Bangladesh | San Francisco, USA

Senior Manager, Release Process & Analytics

Senior Software Test Manager

Software Test Manager

Oct 2017 – Aug 2025

Health-Tech SaaS | Enterprise Cloud Operations

- Directed enterprise-scale release delivery across 17+ concurrent product pipelines for a global health-tech SaaS platform, ensuring predictable, high-quality go-lives.
- Led Analytics and QA teams of 40+ members; mentored senior and junior staff and embedded delivery best practices organization-wide.
- Served as senior delivery partner to Product, Engineering, and Business leadership, translating technical release detail into clear, outcome-focused executive reporting.
- Defined KPIs, risk frameworks, and process improvements that increased delivery predictability across engineering, QA, and release operations.

- Owned budget planning, recruiting, and resource allocation across cross-functional, globally distributed teams.
- Represented the organization at 2024 leadership summits in San Francisco, strengthening executive relationships and global operational alignment.

SoftwarePeople | Dhaka, Bangladesh / Copenhagen, Denmark

Senior QA Engineer

Mar 2014 – Oct 2017

Digital Marketing & Brand Management Platforms

- Owned test strategy and delivery quality for digital marketing and brand-management SaaS platforms serving international clients.
- Acted as the primary point of contact for client demos and status calls, building stakeholder trust and improving release quality and satisfaction.

2020 Technologies | Dhaka, Bangladesh / Laval, Québec, Canada

QA Specialist

Jan 2013 – Feb 2014

Design Software Manufacturing

- Executed smoke, functional, and regression testing for enterprise design software, collaborating with international cross-functional QA teams.

Exling LLC | Dhaka, Bangladesh / Florida, USA

Senior SQA Engineer / Team Lead

Oct 2009 – Dec 2012

SaaS Enterprise Software

- Led an 11-member team supporting enterprise SaaS delivery; mentored engineers and owned functional, usability, exploratory, and GUI testing programs.
- Maintained daily communication with US-based clients, ensuring on-time delivery and long-term customer trust.
- Traveled to the USA (2010) for on-site project collaboration, strengthening global delivery processes.

Panoramic Ltd. | Dhaka, Bangladesh

Trainee Software Developer

Apr 2009 – Aug 2009

- Developed internal tools and web applications using Java and PHP, gaining early exposure to agile, cross-functional collaboration.
